

# CLINICAL WINDOW

Accesses real-time patient information from one or many disparate systems, and makes it available for physician access via web browser. Single signon functionality for clinician access anywhere, anytime.

## FEATURES

**Physician Friendly:** Simple web browser view, no training

**Quick install:** Usually 90 days

**Low Cost:** Only one license fee per facility/ unlimited users per facility.

**Vendor Independent:** Data from HL7 feeds or other means, from any source system: McKesson, Cerner, Siemens, Meditech, Lawson, etc. Non-invasive integration usually requires no cooperation from other vendors.

**Secure:** Information is encrypted via SSL. Fully audit trailed: Log of every session by username, date, time, and patient record.

**Authentication:** Use New Age's built in authentication, or authenticate via Microsoft Active Directory or biometrics.

## FUNCTIONALITY

- ❖ Quick-access tools:
  - ❖ MD-configurable critical indicators, triggered against vital signs and lab values, display on physician list.
  - ❖ MD-configurable flow sheet for access to trended labs and vitals most important to that physician.
  - ❖ Rounding report - summary of all recent data for a patient within the last 24-48 hours.
- ❖ Physician census ("mine and group"), nurse unit census, and "covering" physician census.
- ❖ Clinical results: labs, radiology, transcription.
- ❖ Vital signs, input & output
- ❖ Allergies, height and weight
- ❖ Medication profiles; Orders
- ❖ When used with New Age's *Patient Safety Clinical Alerts* module, enables physician to receive and acknowledge clinical alerts, such as panic lab results.
- ❖ Demographic information including face sheet, diagnosis, and insurance.
- ❖ Architected for data input, i.e. vital signs capture, *100,000 Lives* data collection, etc.

- ❖ Images, such as radiology images, document images, photographs
- ❖ Portal to additional data, such as drug references
- ❖ Use as an "uptime" app, when your systems are "down"
- ❖ Multi-facility

Accessing, integrating and leveraging information to create specialized windows which improve communication, patient safety and health care processes.
