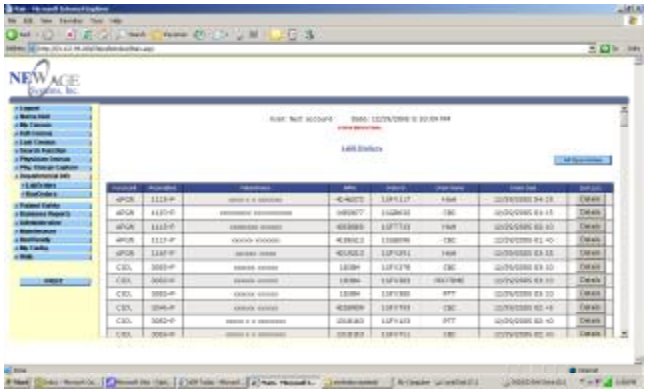
UPTIME

A "Downtime" Solution

We're "up" when your main system(s) are down. A critical part of your disaster preparedness plan, let's clinicians continue to access clinical information during periods of planned or unplanned downtime.



FEATURES

Easy to Use: Simple web browser view, simple intuitive design, no training.

Quick install: Usually 90 days

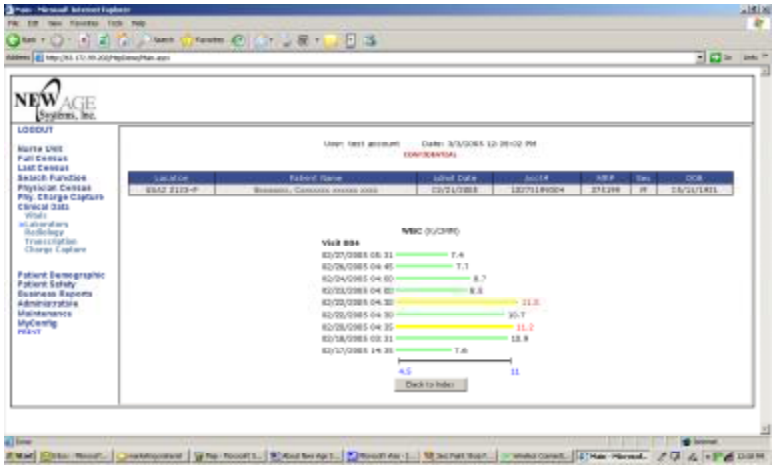
Vendor Independent: Data from HL7 feeds or other means, from any source system: **McKesson, Cerner, Siemens, Meditech, Lawson, etc. Non-invasive integration usually requires no cooperation from other vendors.**

Secure: Information is encrypted via SSL. Fully audit trailed: Log of every session by username, date, time, and patient record.

Authentication: Use New Age's built in authentication, or authenticate via Microsoft Active Directory or biometrics.

FUNCTIONALITY

- **Physician census ("mine" and group), nurse unit census, or search function.**
- **Clinical results: labs, radiology, transcription.**
- **Vital signs, input & output**
- **Allergies, height and weight**
- **Medication profiles**
- **Orders**
- **Departmental views so that ancillaries know what orders they have to process.**
- **Demographic information including face sheet, diagnosis, and insurance.**
- **Images, such as radiology images, document images, photographs**
- **Network down module available - local repository on each nurse unit.**
- **Paper backup option for extensive periods of downtime, i.e. loss of electricity due to major disaster.**



Accessing, integrating and leveraging information to create specialized windows which improve communication, patient safety and health care processes.

Leverage the data repository by sharing it with another New Age application:

- **Clinical Window**
- **PDA Clinical Window**
- **Patient Safety Clinical Alerting**
- **Business Process Monitoring**

Regular usage ensures *Uptime* is ready when you need it, and your organization derives additional value from your data.
